

Eyelash Extension After Care

Eyelash extensions require very gentle care in order for the lashes to last long and stay in good condition. Once the lashes are attached you must not rub or pull on them. You must not wear any mascara or use Eyelash curlers. You should read and understand all the information listed below, and sign the form before you get this service done.

What are Eyelash Extensions?

Eyelash Extensions are synthetic lashes individually attached to your natural eyelash. This service requires skill and precision and should only be performed by a certified, licensed technician. Once applied, these lashes are so natural looking it is difficult to tell even up close that you have extensions on. Different lengths and curls are available for a customized look.

How long do the Eyelashes last?

Depending on how well you care for them and your natural lash cycle, your extensions can last 4-8 weeks. To keep your lashes full and looking great, maintenance appointments, or "fills", are suggested every 2-3 weeks. These are necessary as your lashes grow out in a continuous cycle of replenishment. Please do not attempt to remove any lashes on your own, seek professional help from your technician. **WE WILL NOT BE HELD LIABLE FOR ANY DAMAGE THAT YOU MAY CAUSE BY TRYING TO REMOVE THE EYELASH EXTENSIONS ON YOUR OWN.**

Do the false eyelashes damage my natural eyelashes?

Absolutely not! The lash adhesive is formulated to create a solid bond, specifically for human lashes. As long as lashes are applied safely and correctly, they do not harm the natural lash.

Before your Appointment.

What you should do before your Eyelash Extension appointment. Remove all eye makeup and clean your lashes with mild, oil free cleanser. Do not use oil based makeup removers to clean your lashes prior to the application. Do not put on any mascara. We don't want to spend time cleaning your lashes. We'd rather spend time working on perfecting your lashes. If you are a contact lens wearer, please remove contact lenses and wear glasses to your appointment, or bring a lens case and remove them when you arrive at your appointment. Plan to set aside 1-2 hours for your appointment. Some of our clients fall asleep during the procedure.

- Do not perm or tint lashes immediately before or after lash extension application.
- Do not use a regular eyelash curler.
- Do not rub your eyes or lashes when washing your face. Clean around the eyes with a wash cloth.
- Do not pull your lash extensions-it will take out your own lashes as well.
- Do not go in a sauna while wearing eyelash extensions.
- Do not use waterproof mascara.
- Do not try to remove the extensions on your own.
- Do not cut the extensions (you may cut your own lashes).
- Avoid extensions when removing eye makeup. Use only oil free makeup (including glycerin).
- Remember to come in for touch ups!

What happens if a lash should loosen or become dislodged?

Do not pull on the lash. Please contact Melissa Burlington to make an appointment to have them removed or replaced to avoid damage to your natural lash. As your natural lashes fall out due to the growth cycle, you will need refills when new lashes grow. At first you may find you need a refill every 2 weeks. As you become accustomed to the extensions and with a little practice maintaining the lashes, the time between refills can be extended to 3-4 weeks.
